ROELEVELD - Operation NETBALL

Arrived in field: 21/22 Apr 43

Dropped to CUCUMBER Reception Committee.

NS/KV/228

16th March 1943

To: D/CE.1

From: NS

In reply to your DCEL/KB/5038 dated 15 Mar 43,
the code name NETBALL covers the operation for
despatching ROBLEVELD, a W/T operator, to the field.

8th March 1943

To: MS

From: NT

A Dutch wireless operator (NETBALL) will be going to the field to a Reception Committee in about a week's time. On the W/T.2 forms which I submitted in respect of this agent I requested that sufficient spare plans and code poems should be given to him to cover his needs for six months. The choice of the period of six months is, of course, purely arbitrary.

I was informed by D/YC.M this morning that O.C. STATION 52 objected to providing the man with spare poems on the grounds of security. I would now like to confirm my conversation with MS/A on this subject in which I pointed out

- a) that the agent in question is going to a Reception Committee and can, if necessary, leave any written matter which he does not care to carry about with him with this Committee
- b) that if spare plans and poems are not taken by the agent himself they would have to be sent with a container operation to the same Reception Committee and passed to him by hand through various intermediaries. This is an undertaking which we naturally wish to avoid.

I ventured to suggest to MS/A that the question of whether an agent should take spare plans and poems with him, or whether these should be sent to him afterwards, was a matter for the Country Section to decide after consideration of the circumstances of the agent's work in the field and of the requirements of MS Section.

I understand that MS/A agrees that in this case at least the operation should go on as requested in our W/T form, and would respectfully ask you to take the necessary action.

From. D/AF.

I hold a report from Dr. Jones dated 8.9.42. which reads as follows:-

"Sgt. ROELEVELD fractured his left forearm on 31.8.42. and has been in hospital since. The hand and forearm are in plaster. I can offer no opinion until I see an X-ray picture which I am having done tomorrow. As a rule this type of case takes generally about 6-8 weeks before useful function is obtained."

16th March, 1942.

With reference to your enquiry re a second plan for NETBALL, Capt. Grice has a big piece of work on at the moment re-allocating frequencies; so that it would be inadvisable at the moment to send a second NETBALL plan which might have to be changed before it was in use.

I enclose herewith Capt. Grice's message re NETBALL's first date for coming into operation.
